## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's explanation of the instant invention in pointing the difference with the cited prior art was persuasive.

### ***Allowable Subject Matter***

2. Claims 2 – 7 are now allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 2, 4 and 5 recite, inter alia, a method of forming a ferroelectric film including a complex oxide of lead zirconate titanate (PZT) family on a metal film formed of platinum (Pt) by using a metalorganic chemical vapor deposition method comprising the step of forming an alloy film of Pb and Pt on the metal film, the alloy film being formed in an inert gas atmosphere. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 3, 6 and 7 recite, inter alia, a method of forming a ferroelectric film including a complex oxide of lead zirconate titanate (PZT) family on a metal film formed of platinum (Pt) by using a metalorganic chemical vapor deposition method comprising the step of forming an alloy film of Pb and Pt on the metal film, the alloy film being formed at about 150°C. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

### ***Conclusion***
